Professional Summary

Senior Frontend Engineer with over 5 years of experience building scalable, high-performance web applications using React.js, TypeScript, Next.js, and Vue.js. Skilled in frontend architecture, performance optimization, reusable component systems, real-time applications, accessibility standards, and modern engineering practices.

Experience

Senior React.js Developer • Techflitter Solutions

May 2022 - Present • Ahmedabad

- Led a team of 5 engineers by estimating work, managing deliverables, and delegating tasks to ensure timely feature delivery
- Designed reusable component libraries and custom hooks, reducing UI duplication by 35% across projects
- Developed scalable SSR-ready modules using Next.js and TypeScript to improve rendering performance and scalability
- Integrated 100+ RESTful APIs and handled data flow using state management tools like Redux and RTK-Query
- Improved performance and bundle size by 40% using lazy loading, code splitting, dynamic imports, and memoization
- Conducted code reviews and collaborated with QA and product teams to validate E2E workflows
- Increased feature reliability with Jest component and functional test cases, significantly reducing post-release defects
- Spearheaded modernization of frontend tooling by migrating applications from CRA/Webpack to Vite, improving build efficiency, enhancing developer productivity, and reducing development server startup time by 75%.
- Managed deployments using AWS services including CloudFront, S3, CloudFormation, CloudWatch, and AWS CLI

React.js Developer • Rex Innovation

Jan 2021 - May 2022 • Ahmedabad

- Contributed across the full SDLC in an Agile environment, from requirements to deployment and post-release support
- Translated client requirements into scalable solutions, accelerating delivery through biweekly progress demos
- Designed reusable React.js component architectures using modern practices (hooks, context, state, and props)
- Integrated GraphQL for dynamic data fetching from CMS, enhancing content management
- Implemented error boundaries and fallback UI, preventing app crashes by 85% and ensuring a smooth user experience

JavaScript Developer Intern • Novatrice

Dec 2019 - Jan 2021 • Ahmedabad

- Developed dynamic web applications using DOM manipulation, jQuery, and AJAX
- Ensured cross-browser compatibility and responsive design using Bootstrap, CSS Grid, Flexbox, and media queries

Projects

Electric Vehicle Dashboard

- Developed role-based dashboard for 220+ cities and 78K+ users, delivering high performance application experience
- Built WebSocket-based real-time vehicle tracking and interactive analytics with optimized rendering strategies

Food Management System

- Engineered scalable management platform used by 2.5K+ restaurant owners, featuring interactive data tables, operational workflows, and document verification systems
- Improved deployment reliability and release efficiency by implementing automated CI/CD pipelines

Food Ordering System

- Designed engaging listing experience of 75+ restaurants, adding personalized recommendations based on user activity
- Resolved billing failures by creating payment retries and initial card validations, resulting 98% successful payment rate

Solar Monitoring System

- Developed dynamic forms fully dependent on backend API response, accelerating development efficiency by 40%
- Enhanced Lighthouse accessibility score from 64 to 88 by implementing semantic HTML and keyboard navigations

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, HTML, CSS, Sass

Libraries & Frameworks: React.js, Redux, Context API, Next.js, Vue.js, Vuex, jQuery, Jest, React Testing Library, Sanity, WebSocket, Stripe, Tailwind CSS, Styled Components, Framer Motion, Material UI

Tools & Platforms: Github, Storybook, Vite, Webpack, Jira, AWS, CI/CD, CloudFront, S3

Education

BTech. • Charotar University of Science and Technology

2017 - 2020 • Changa

Diploma • Noble University

2014 - 2017 • Junagadh
